Plate Heat Exchanger
Indirect Fired Water Heater
Uses Low Temperature Boiler Water To Heat Domestic Water

Features

- Reliable
  - Only non-ferrous components on domestic water side
  - Replaceable brazed plate or plate and frame heat exchanger
  - Heavy duty construction withstands demanding commercial/industrial use

- Packaged System
  - Factory selected and sized boiler water control valve simplifies installation and ensures reliable operation

- Versatile
  - Compact design requires minimal floor space
  - Designed to fit through a standard door opening

Applications

- Schools
- Office Buildings
- Sports Venues
- Hotels
- Industrial Facilities
- Nursing Homes
- Hospitals
- Heat Recovery Systems

Model BWXP
Instantaneous Type
The Model BWXP is equipped with all operating controls and ready for immediate installation

A Heavy Duty Indirect Fired Water Heater

The Model BWXP is a fully packaged indirect fired water heater utilizing boiler water from a condensing boiler as the energy source for heating potable water. By utilizing plate type heat exchangers the system can provide efficient heat transfer at temperatures below traditional U-tube bundles. The entire package is designed to be a reliable and long lasting source of hot water. Each component is carefully selected to ensure high performance in even the most demanding applications. All components on the potable water side will be constructed with non-ferrous material. Whether you are heating potable water in a commercial building or process water for an industrial application, you can select a Hubbell BWXP to do the job. When you specify and install a Hubbell water heater, you will be provided with a quality product that is a long lasting and trouble free source of hot water.
**Specifications:**

**Standard Equipment:**

- **Heat Exchanger**
  Plate heat exchangers are extremely efficient, allowing for close or cross temperature approaches between the boiler water and heated water. Hubbell offers single wall or double wall brazed plate or plate and frame type heat exchangers.

- **Control Valve**
  Hubbell water heaters are factory furnished with a boiler water control system to regulate the flow of boiler water through the heat exchanger.
  - Modulating 3-Way Diverting Valve
  - Modulating 2-Way

- **High Limit Safety System**
  Fail safe control valve for over temperature protection valve opens and sends over temp water to drain until over temp condition is remedied

- **Temperature and Pressure Gauges**
  Provided on boiler and domestic water inlet and outlet connections.

- **Pressure and Temperature Relief Valve**
  All Hubbell packaged systems are provided with a T&P Relief Valve sized for the maximum output of the heat exchanger.

- **Intra-System Domestic Water Circulator**
  Domestic water fractional horsepower pump circulates water through the heat exchanger. Reducing the potential for scale build-up and maximizing the heat transfer efficiency of the system.

- **Structural Steel Base**
  Designed to fit through a doorway. The structural steel base affords easy rigging and protects components from damage.
Optional Features:

- 1. Remote start/stop
- 2. Dry contacts for over temperature indication
- 3. Audible alarm system
- 4. Double safety solenoid
- 5. Double wall heat exchanger
- 6. Alternate water temperature range
- 7. Pump Enable (HVAC only)
- 8. 300 psi working pressure
- 9. RS-485 modbus communication port for remote operation of the temperature controller
- 10. 4-20mA signal for remote temperature indication
- 11. NEMA 4 construction for wet locations

Please note: optional equipment may impact overall dimensions and weight. Please request submittal drawing from factory.

**Plate Exchanger:**
- BPS = Single Wall, Brazed
- BPD = Double Wall, Brazed
- PFS = Single Wall, Plate & Frame
- PFD = Double Wall, Plate & Frame

**Note:**
Any and all optional equipment for a water heater must be called out in the written specifications. A model number in and of itself does not reflect any optional equipment selected.
Hubbell is a leader in the design, engineering and manufacturing of water heaters for use in demanding Commercial, Industrial, Marine/Offshore and Naval markets. Hubbell products are engineered and manufactured in the U.S., and built with only the highest quality materials and technologies including Hydrastone cement, stainless steel, and digital controls. Hubbell is ISO 9001 meeting all the current standards including: cULus, ASME, ASHRAE, ANSI/NSF5, USCG, ABS, DNV, ASME, NR13 and MIL. With dependability, long life, and trouble-free service design, Hubbell water heaters are trusted all over the world adding value to every installation.
